

The Natural Mineral Water from the heart of the Swiss Alps

SwissMountain—the King of Mineral Waters—is bottled directly at the spring of Termen.

In fact, the source is very close to the world's most photographed mountain, the Matterhorn, near the famous resort of Zermatt. The spring is located in the heart of the Swiss Alps, surrounded by high Alpine mountains.

The Matterhorn, the king of mountains, is the shining example for SwissMountain!

OUR WATER IS - SWISS

SwissMountain, a safe choice for good health and vitality!

SwissMountain mineral water rises up through the Valais Alps. Deep inside the mountains, the water is naturally purified and enriched with minerals, which gives this absolutely natural product its unique flavour.

More about "The Spring"...

The spring is fed by a high Alpine reservoir, which is the main source of Europe's water, and is located 60 metres below ground, well-protected by the earth's soil and sedimentation dating back to the last ice age.

After many years of natural filtration, the water contains a balanced mineral content and is entirely free of any microbiological contamination and industrial or agricultural pollution.

[PDF](#) [Want to know more about Hydration Water and Health](#)

[PDF](#) [SwissMountain Consumer Leaflet 2021](#)

SwissMountain is protected from outside influences.

The spring water filters through the glacier-topped mountains of the Swiss Alps. During its long journey through loose rock and gravel deposits from the last ice age, the water takes on its very own character that can be tasted in every drop.

Where to Buy

Microbiological purity

After many years of natural filtration through numerous rock layers, and protected by high Alpine mountains and glaciers, the water attains a microbiological purity of the highest standards. With the addition of oxygen, and flowing through a quartz sand, the natural iron content in the water is removed. The practical zero levels of nitrate and uranium is an indication of the purity of this natural mineral water.

The pleasure of drinking SwissMountain "Natural"

Our crystal clear still water is an ideal thirst quencher which activates many sensory receptors in the mouth. The salty calcium and magnesium content can be savoured, with a finish characterized by a light sulfate taste combined with the remarkable note of the minerals.

Not suitable for babies/infants due to Sulphate levels

Natural

The pleasure of drinking SwissMountain "Sparkling"

Water has a refreshing sensation; there is a light effervescence on the tongue, and the taste is defined by a discrete fruity finish.

Microbes do not survive in sparkling water because the dissolved carbon dioxide makes it acid. The carbonic acid that gives sparkling water its effervescence is a mild antiseptic (Finewater, M. Mascha)

Carbonated water has benefits for digestion. It may improve swallowing, increase feelings of fullness and reduce constipation.

SwissMountain contains max. 8.2 grams per liter CO2 at the time of bottle

OUR WATER IS - SAFE

Originates from a natural spring in the Valais Alps

Our amazing story starts many years ago when Alpine snow and rain travelled through many layers of the earth's geological formations. The water is finally captured in an underground layer of glacier rocks, naturally filtered and preserved. It emerges light, pure and refreshing.

It is through this voyage that SwissMountain grows into a natural, unspoiled, and mature mineral water with its unique beneficial mineralization; safe and neutral in taste.

"Untouched by man" (until you unscrew the cap)

High bacteriological purity

The water flows evenly at a constant temperature of about 10 degrees Celsius from the top of the source into a sealed modern production system that places the water directly into our 100% recyclable and high quality PET.

Our high quality is IFS certified

ProCert Safety AG certifies that SwissMountain/Pearlwater ranks at "high level" of the International Food Standard (IFS) in the production of mineral water and soft drinks.

[PDF](#) IFS Certificate

SwissMountain is bottled in partnership with Pearlwater—a division of SWISS COOP

In the Valais Alps of Switzerland. Quality controls are strict. Standards are high. The plant has the quality of mineral waters, soft drinks and production processes tested externally at regular intervals.

And recognized by FineWaters connoisseur's guide

SwissMountain was awarded a maximum 5 star award for "Virginity" at www.FineWaters.com. This indicates how protected a water is from its surroundings. Importantly, SwissMountain's Nitrate and Uranium levels are practically Zero, thus indicating a remarkable unspoiled source. (Nitrate: < 0.1 mg/l, Uranium: 0.0017 mg/l)

OUR WATER IS - HEALTHY

Healthy for the whole family!

Yes, water is essential to your good health. Actually, 60-70 % of our body is water and most of it will come from what you drink and eat. Knowing that an average adult loses about 2.5 liters of water each day (in normal conditions), you must replace these liquids and minerals in order to stay properly hydrated and healthy.

...and what better drink than Natural Mineral Water to do so?
Naturally filtered and preserved (without the use of any purification systems or chemicals)

HEALTH & PLEASURE

SwissMountain is all about "Health & Pleasure" for us; the positive social experiences are inseparable from good health.

SwissMountain for everyday

SwissMountain is suitable for a low sodium diet. Through its balanced mineralization, it is a perfect all-day thirst quencher. Before breakfast, during breaks, or to accompany a meal, it is a genuine all-rounder.

After mental or physical activity it has a revitalising effect, and the ideal mix of minerals helps the body to recover.

Note: We do not recommend SwissMountain for babies (due to sulphate level)

Mineral Composition per 100ml	SwissMountain
Calcium Ca ⁺⁺	208 mg/l
Magnesium Mg ⁺⁺	37 mg/l
Sodium Na ⁺	5.2 mg/l
Potassium K ⁺	1.9 mg/l
Silicium H ₂ SiO ₃	10 mg/l
Bicarbonat HCO ₃ ⁻	239 mg/l
Chloride Cl ⁻	4.9 mg/l
Sulfat SO ₄ ^{- -}	480 mg/l
Fluoride F ⁻	0.06 mg/l
Nitrate NO ₃	<0.1 mg/l
Total dissolved solids	986 mg/l

MORE ABOUT

Minerals in SwissMountain Products

Our bodies cannot produce all of the minerals we need by themselves. SwissMountain mineral water can help to provide your body with these minerals and trace elements. Find out more about the minerals in our products

Calcium

Calcium (Ca⁺⁺) is required for maintaining healthy bones and teeth and reduces the risk of osteoporosis.

Magnesium

Magnesium helps the nervous system and muscular system to function normally by supporting the stimulation of nerves and muscles.

Sulphate

Sulphate (SO₄) stimulates digestion and improves the density of hair.

Hydrocarbonate

Hydrocarbonate (HCO₃) contributes to a normal acid-base homeostasis and can minimize heartburn.

Fluoride

Fluoride inhibits tooth decay and helps with normal enamel formation. It is especially important for growing teeth and can only be found in very few foodstuffs, e.g. as a salt additive.

Silica

Silica is a compound of oxygen and silicon. It improves bone density, supports the development of connective tissue and helps to strengthen the skin, hair and nails.

OUR WATER TASTES GREAT!

The King of Mineral Waters simply
tastes GREAT!

In fact, at first taste of our natural mineral water (blue label) you may note a clean, smooth & light consistency with no aftertaste – leaving your palate refreshed and your body hydrated.

In fact, most people enjoy it at room temperature but it is also very pleasant cold or chilled.

Also, by using the highest quality PET we ensure that our water tastes the same as if you were drinking it **“fresh at the source”**.

Sustainability

SwissMountain's natural mineral water surges out from a natural spring in the Valais Alps surrounded by high Alpine peaks. Deep inside the mountains, the water is naturally purified and enriched with minerals, which gives this absolutely natural product its unique flavour.

100%
RECYCLABLE

Eco-packaging

Our PET bottles are made of 100% Swiss Recycling-PET and can be recycled again to create new PET-Bottles and Caps

With our revolutionary cap-system, the weight of the PET bottle has been reduced by 15%, an annual saving of 700 tons plastic per year

Eco-Production

We use only about 15% of the natural flow of the source. As such, we are careful to maintain the natural habitat of animals and water quality for future generations.

Eco-Transportation

Transport emissions are reduced through effective control of the supply chain from production to delivery (by partnering with globally leading logistic specialists).

For instance, we favor rail & barge transport whenever possible as they are the most fuel-efficient.

Eco-Energy

With our newly installed solar panels, 15% of the energy used comes from our own production. We recycle as many waste as possible, up to 90% is used again.

COMPANY OVERVIEW

SwissMountain—is totally SWISS.

SwissMountain mineral water stands for confidence, premium quality, naturalness, freshness, purity, elegance and reliability—a classic and very traditional product.

SwissMountain Beverages International LLC is domiciled in the canton of Zug, Switzerland. The brand is bottled in the heart of the Swiss Alps in the village of Termen (near the resort of Zermatt) by Pearlwater – a division of Swiss COOP, a major Swiss retail chain.

MISSION, VISION & VALUES

OUR MISSION

Improving consumer health through value-added, non-sugar beverages **“Made in Switzerland”**. This includes new products such as:

OUR VISION

Become one of the preferred premium mineral water brands in selected (mature or growing) imported bottled water markets worldwide. (Swiss COOP's equivalent domestic brand is already enjoying one of the highest market shares in the domestic market).

[PDF](#) [More about SwissMountain flavoured waters](#)

OUR VALUES

HEALTH & PLEASURE

SwissMountain is all about “Health & Pleasure”, providing a positive health and social experience to consumers is our ultimate goal.

SUSTAINABILITY

SwissMountain is an ecological and socially responsible company. The brand is bottled in partnership with Swiss COOP, a multi-billion dollar retail chain with impeccable standards and values.

For instance, the plant has recently reduced the weight of PET bottles (saving ca. 700 tons/annum) and strives to minimize carbon footprint through effective control of the supply chain from production to delivery.

PASSION FOR QUALITY

The “Made in Switzerland” connotation is never compromised. All products are made under highest quality and safety standards.

SPARKLING

Swiss Sparkling Mineral Water

The lightly sparkling or green label is a natural and healthy alternative to soda's.

On the way, during meals or to mix with cocktails; you will love it for its "light fizz" (allowing a very tasteful experience).

Available in our
Eco-Pack* PET bottles
for your convenience:

1500ml

500ml

100%
RECYCLABLE

HOW IT'S MADE?

SwissMountain's carbonated water is made with exactly the same water as our "Natural Mineral Water" (green label) and bottled right next to our source.

The only difference comes when the bottle is opened; the added pressure (during bottling) is released, allowing the "fizz" to come out of the water, thus forming the characteristic bubbles.

* Eco-pack PET bottles – refers to our recyclable bottles and sustainability efforts to protect our nature and future generations.
